TOPAZ Swivel Monitor

Desktop Video Magnifier

The newest addition to our TOPAZ line

At a Glance:

These new TOPAZ models offer built-in features that make them easier to use than other solutions:

- The swivel monitor can be raised, lowered, and turned side-to-side
- Unique Freeze Frame button control
- 16 magnification levels with a crisp, sharp image
- 28 high contrast text color combos
- Directed LED light for a bright work surface with no glare bouncing back in the image
- Extra large reading table

The TOPAZ with Swivel Monitor makes it easy to use your video magnifier in a wide range of situations. Simply move the monitor left or right and tilt it for the best viewing angle. It stays where you set it — perfect for working on your computer while referencing printed material, checking a recipe while preparing a meal, or when collaborating and sharing the magnified view with others.

The monitor raises, lowers, and swivels a full 180° from side to side.

Freeze Frame Button

No other desktop video magnifier offers Freeze Frame like the TOPAZ Swivel Monitor. You'll find so many uses for this unique feature: for instance, use your finger as a placekeeper on a magnified phone number, and freeze the frame to free up both hands for dialing the phone. Freeze a magnified frame of cooking instructions on a food package, then take the package away to prepare it.

TOPAZ[®] Swivel Monitor

Freedom Scientific

The forward-mounted camera is a full 8.25 inches above the table, so you have plenty of room to work, write, and do projects like tightening the tiny screws on your eyeglass frames, threading needles, and hand sewing. Some other great activities that you can resume include reading:

- Tiny print in contracts
- Numbers in the phone book
- Instructions on prescription bottles, even round and square containers
- Labels from products of all sizes and shapes
- Crossword puzzles
- Controls on portable telephones and remote controls
